Michael Edhere

Solutions Architect | Software Engineer | Tech Consultant
Abuja, Federal Capital Territory, Nigeria

Summary

With over a decade of experience as a software engineer and solutions architect, I specialize in multiple programming languages, frameworks, and services, with a diverse background that spans fullstack and mobile development, cloud management, database administration, hardware, networking, cybersecurity, and business systems analysis.

Over the years, I have developed extensive expertise in enterprise architecture and IT solutions consulting, combining a strong background in technical sales, vendor solutions, and business process optimization with deep knowledge of competitive products and market positioning.

Experience

Oracle

Principal Account Cloud Engineer

July 2025 - Present

Federal Capital Territory, Nigeria

Oracle Corporation is a global technology leader providing integrated cloud applications and platform services. The company specializes in delivering scalable database management systems, enterprise software, and advanced cloud infrastructure to accelerate digital transformation.

As a principal solutions architect, leadership was provided for high-level engineering engagements with key clients, ensuring customer satisfaction. Responsibilities included offering technical advisory to customers and promoting the adoption of Oracle technologies aligned with their business requirements. This involved devising creative solutions, delivering end-to-end solution architectures, and taking the lead in guiding internal and external teams on architect blueprints, and project implementation and integration. Furthermore, tasks included developing and delivering compelling Oracle presentations, innovative propositions, design solutions, developing engineering blueprints, steering approved projects. Execution required handling non-routine and complex tasks, applying advanced technical

and business skills, and cultivating and strengthening technical customer relationships for continued success.

Prediagnosis International
Head of Information Technology
May 2023 - April 2025
Nigeria

PreDiagnosis International is a health technology organization dedicated to early disease detection and personalized treatment. They specialize in risk assessment, early identification of diseases, and the delivery of targeted therapies to improve patient outcomes. In addition to their clinical focus, PreDiagnosis International also offers innovative technological solutions to healthcare establishments, supporting improved efficiency and care delivery.

As Head of IT, I took the lead in the development and architecture of multiple telehealth platforms, optimized business processes through innovative IT solutions, and built and managed robust IT infrastructure, with over 200,000 users on such systems.

WalexBiz Group
Head of Information Technology
March 2022 - May 2023
Federal Capital Territory, Nigeria

WalexBiz Group is a Nigerian software solutions company offering web hosting, cloud services, cybersecurity, custom software development and solutions engineering. They are committed to helping businesses of all sizes leverage technology to improve their operations and achieve their goals.

I led the development of custom apps for 12 companies with over 25,000 users. Used different tech stacks and deployed them on cloud platforms, designed, deployed, and monitored different solutions for business needs of these companies. I also mentored young developers.

Inretia Technologies
Founder
August 2020 - February 2023
FCT, Nigeria

Inretia Technologies is a company that remotely provides IT solutions and services to local and foreign companies. They offer a wide range of services,

including custom software development, cybersecurity services, cloud services, data analytics, AI solutions, and technology consulting.

As a startup created during the 2020 pandemic and rebranded in 2022, with other members, I put together multiple remote teams that built diverse web apps for local & international clients, hosted all applications on cloud platforms, designed and integrated solutions for SMEs, and trained young developers.

Espirogen Network Solutions Limited

Software Engineer

June 2016 - August 2020

Abuja, Federal Capital Territory, Nigeria

Espirogen Network Solutions Limited is a Nigerian IT company providing computer hardware and software services, including software engineering and training.

With a fullstack team, we created products and solutions for individuals and businesses, ranging from web and mobile applications to full-blown integrated systems.

National Directorate Of Employment (NDE)

Instructor

January 2016 - May 2016

Federal Secretariat Complex, PMB 102021, Makurdi, Benue State

The National Directorate of Employment (NDE) is a Nigerian government agency established to address unemployment through skills acquisition, entrepreneurship development, and job creation program.

Alongside other tech personnel, I trained staff on use of computers & internet security. Implemented security best practices. Upgraded systems and servers.

University of Agriculture, Makurdi

Junior Software Engineer

June 2015 - May 2016 (1 year)

Benue State, Nigeria

The University of Agriculture, Makurdi (now known as Joseph Sarwuan Tarka University) is a Nigerian university focused on agricultural education and research.

In this role, I participated in developing an e-library and lecturer portfolios. Managed computer systems, networks, and servers. Trained in database, networking, and project management.

Interserve Nigeria Limited

Intern

September 2014 - May 2015

Abuja, Nigeria

As an new graduate, I gained professional experience, improved my software development skills and worked with clients to develop websites and web applications.
